

Why You Should Publish your PDF with a Creative Commons License

Spread your message wider and faster

If you want the contents of your PDF document to remain a secret, then a creative commons license is a bad idea.

But if, for example, you are an expert, publishing a white paper to establish your authority in your field or a scientist writing about a scientific discovery, you would probably like your message to travel as fast and as far as possible.

Publishing your PDF under a Creative Commons license allows colleagues, bloggers, social media sites and even newspapers to republish your work and create new content based on it as long as they clearly state that you are the creator.

This way, your work gets spread around much faster and you still retain the credit for it.

Get commercial benefits if your work becomes popular

If you want to be able to profit from your PDF content and still use the Internet's amazing ability to spread free-content, you can publish your work under a Non-Commercial Creative Commons license.

This way, when your work becomes popular and commercial entities want to use it, they have to get your permission (and hopefully pay for it).

You can learn more about the Creative Commons at

www.creativecommons.org

[Attribution-NonCommercial-NoDerivs 3.0 Unported](#)

You are free:

to Share - to copy, distribute and transmit the work

Under the following conditions:

Attribution. You must attribute the work in the manner specified by the author or licensor (but not in any way that suggests that they endorse you or your use of the work).

Noncommercial. You may not use this work for commercial purposes.

No Derivative Works. You may not alter, transform, or build upon this work.

- For any reuse or distribution, you must make clear to others the license terms of this work. The best way to do this is with a link to this web page.
- Any of the above conditions can be waived if you get permission from the copyright holder.
- Nothing in this license impairs or restricts the author's moral rights.
